

Record Breaking Performance Swimwear

Arena 2010 Racing Swimwear Range

Arena offers the most complete and advanced line-up of top performance racing suits (approved by FINA), based on the unquestionable know-how which drove to the creation of POWERSKIN X-GLIDE

- World class, hi-tech fabrics, specially developed for Arena by the Kinetech Lab, delivering perfect compression and gliding
- Unique, patented patterns helping the swimmer to get improved posture during the stroke, while also giving superior fit and comfort
- The knowledge developed by the Arena scientific network about surface and form drag reduction

Arena 2010 Racing Swimwear Range

POWERSKIN ST

Powerskin® ST is a highly performing racing swimsuit made of X-FLAT, a very light knitted fabric (142 gr/m²), specially treated to obtain an **extra smooth outer surface**.

Thanks to the thinness and higher content of Lycra® (29%), of its X-FLAT fabric,

Powerskin® ST ensures **outstanding comfort and dries very quickly**.

X-FLAT fabric also guarantees **excellent durability** in chlorinated water and **protection** against ultra violet rays (50+ UPF).

POWERSKIN XP

Powerskin® XP delivers higher speed in swimming, thanks to its revolutionary ZRaptor+ high-tech and ultra-light fabric (120 gr/m²), which makes the suit **smoother and more hydro-dynamic** than any comparable suit from competition.

Thanks to Z-Raptor+ fabric features (35% of Lycra®, with 100% horizontal / vertical elasticity), **Powerskin® XP** delivers **superior compression** on the swimmer's body, still guaranteeing maximum freedom of movement. **Powerskin® XP** also significantly **reduces surface drag** thanks to its pattern, optimized stitching and superior Teflon coating.

POWERSKIN R-EVO

Powerskin® R-EVO is a technological jewel, which has proven to be **the fastest and the lightest racing swimsuit** ever made with a 100% textile material. Thanks to the high-tech, ultra-light Arena Stealth fabric (99 gr/m²) all **Powerskin R-EVO** suits weight less than 100g, guaranteeing **optimal compression** combined with **unmatchable comfort**.

Powerskin R-EVO is the one and only racing suit featuring the patented Arena **one-piece design** which, in combination with an advanced thermo-bonding system, allows a 100% stitch-less construction, with zero seams on the front.

Powerskin® R-EVO also allows the swimmer to keep **superb stability** and **body alignment** during the stroke, **reducing surface and form drag**.
